

Casey Lister

I'm a full-stack developer driven by the enjoyment of continual learning. Known for attention to detail and organization, I use creative solutions that bring applications to life. I believe communication and cohesion between teams is the key to a successful project delivery.

PROJECTS

Cryptocurrency Price Tracker

- Used HTML, CSS, JavaScript, and APIs to display the always changing cryptocurrency prices
- Set restriction to display top 30 based on market cap
- Created a currency converter to compare cryptocurrency values

Relaxn

- Used CSS, Javascript, Node.js, and Express.js to create a React site for relaxation based on users mood
- Set up authenticity using JWT
- Connected Apollo database to MongoDB
- Created a mock donation function using Stripe

Tech Savvy Blog

- Built a CMS-style site for users to publish posts and comment on others
- Followed MVC architectural design using Handlebars.js as the templating language
- Used Sequelize as the ORM
- Set login authenticity using express-session npm package
